Tinbin

The Tinbin TC2 vac attachment is well suited for cleaning fouled ballast. This system is very effective for use in tight areas, and for spot cleaning in remote locations. It is compact and nimble which also makes it a good solution for transit authorities.

Cranemasters selected this system for its suitability with railroad infrastructure. It is an excellent tool for:

- Cleaning around ties
- Removing fouled ballast
- Removing mud
- Working in remote areas with limited access
- Working in 3rd rail and catenary environments
- Dumping on site for continuous use
- Working around communication and signal cabling
