Track Construction & Maintenance

As a full-service railroad provider, Cranemasters is much more than a crane company. We've also worked on tracks and rail lines since 1988.

Cranemasters can construct, inspect, maintain, repair or dismantle track on main rail lines and railyards both large and small, as well as private industry and transit authority tracks.

Whatever it takes to construct, maintain, or restore your rail line, we have the expertise to recommend and execute a cost-effective solution. If you need a section of track built, repaired or replaced, we can do that at Cranemasters. And so much more. Call us for an estimate to handle the whole project or any part of it.

Some examples of track work that we have regularly performed include:

- Track inspections
- Development of maintenance plans
- Crane rail inspection and maintenance
- Direct fixation
- New turnout and track construction
- Emergency response
- Repairing/replacing grade crossings
- Installing frogs and switches
- Track surfacing and alignment
- Ballast regulating
- Thermite welding
- Track take-up
- Mowing right-of-way
- Laying panel track
