**Emergency 24/7/365
800-624-0543**

Cranemasters' patented innovative equipment and strategic systems operations reduce railroad and industrial siding losses safely and rapidly.

Those same efficiencies keep jobs like bridge span replacement, complex track installation and repair, load adjustment and transfer, and railcar and locomotive maintenance and repair under control, predictably reducing your total cost of ownership.

Derailment Recovery

Derailments can cause significant disruptions, but our specialized response teams are prepared to handle all aspects of derailment recovery, including:

Rapid Emergency Response: Our teams are on standby 24/7/365, ensuring immediate dispatch to derailment sites. 200 RS Super-Duty Cranes arrive at highway speeds on our custom rigs.

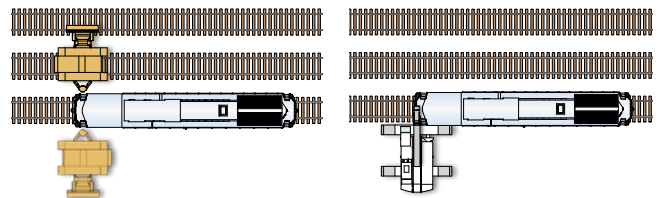

Risk Mitigation Expertise: We determine the safest and most effective recovery strategy while ensuring compliance with regulatory agencies.

Track and Infrastructure Repair: We restore damaged tracks, switches, and supporting structures to bring your operations back online.

Heavy-Duty Railcar and Locomotive Lifting:

The Cranemasters 200 RS Super-Duty Crane is purpose-built to lift and carry railcars and locomotives from just one side, so we don't block rail traffic on adjacent tracks and we can operate in the most demanding terrain—with less resources required than traditional approaches.

The Cranemasters 200 RS Super-Duty Crane lifts and carries locomotives and rail cars from only one side. Traditional booms attached to bulldozers need two sides to lift rail cars.
